HARSHIL K

Software Developer | DataAnalyst|Full-StackDevelopment & Data Analytics

Bangalore, India | +91-8089512323 | harshil.connect.in@gmail.com | harshil-portfolio.me | linkedin.com/in/harshil-mca | github.com/Harshil-MCA

PROFESSIONAL SUMMARY

Software Developer and Data Analyst with an MCA and a B.Sc. in Computer Science, with hands-on experience building full-stack web applications and database-driven systems using Python, Java, SQL, MySQL, Django, and Flask, alongside data cleaning, exploratory data analysis (EDA), and Power BI dashboards. Currently gaining practical exposure to Data Analytics and Data Visualization through an ongoing internship at Imarticus Learning, Bangalore. Strongproblem-solving abilities, a solid foundation in data structures and software engineering practices, and a commitment to continuous learning.

TECHNICAL SKILLS

- Programming & Query Languages: Python, Java, C, SQL
- Web Technologies & Frameworks: HTML, CSS, JavaScript, Django, Flask, React, RESTful APIs, MVC Architecture
- Databases & Concepts: MySQL, Database Design, OOP, Data Structures
- Data Analytics & Visualization: Data Analysis, EDA, Data Cleaning, Data Quality Checks, Pandas, Power BI, MS Excel, Reporting Fundamentals • Tools & Platforms: Git, GitHub, VS Code, Windows, Linux, OpenCV
- Security Fundamentals: Ethical Hacking, Information Security, Cyber Threat Management

INTERNSHIP EXPERIENCE

Data Analytics Intern — Imarticus Learning, Koramangala, Bangalore*Aug 2026 – Sep 2026*

- Selected for a Data Analytics Internship at Imarticus Learning, gaining hands-on exposure to Data Analytics and Data Visualization
- Building foundational skills in analytical workflows, structured data analysis, and data-driven problem solving

Cyber Security Intern — HKIT Cyber Security Solutions*Jun 2025 – Jul 2025*

- Applied analytical and technical problem-solving skills to research real-world security vulnerabilities and systems
- Collaborated with a technical team to document findings and implement best practices in a structured, process-driven environment
- Builta foundation in secure coding principles and system design considerations applicable to full-stack development

KEY ACADEMIC PROJECTS

Attendance System – Face Recognition (Python, Django, OpenCV)

- Architected a full-stack attendance solution using Python and Django (MVC pattern), integrating OpenCV for real-time face detection and recognition Designed the database schema and backend logic for facial data training, image processing, and automated attendance logging, minimizing proxy attendance

TravelNex – AI-Powered Intelligent Travel Planner (Python, Flask, MySQL, JavaScript)

- Engineered a full-stack travel planning web application with Flask backend and MySQL database, integrating multiple third-party APIs for real-time data Built key features including personalized recommendations, itinerary generation, an AI chatbot, and a destination gallery, focusing on clean UI/UX and modular code structure

SmartChef – AI-Powered Cooking Assistant (Flutter Mobile App : Flutter, Dart, Firebase, Google ML Kit OCR, Google Gemini API, USDA API)

- Developed a Flutter app for ingredient identification, weight extraction from scale images, and nutrition calculation using APIs and local datasets.

SmartChef – Web-Based Nutrition and Recipe Planner (React, Django REST Framework, Python, SQL, REST APIs)

- Developed a web application for nutrition analysis, recipe recommendations, and personalized diet planning using React and Django REST APIs.

Electric Vehicle Data Analysis and Power BI Dashboard (Python, Pandas, Power BI, EDA, Data Cleaning)

- Cleaned and analyzed approximately 177,866 electric-vehicle records using Python and Pandas.
- Created an interactive Power BI dashboard analyzing EV types, manufacturers, model years, electric range, geographic distribution, and eligibility, using KPI cards, charts, and slicers.

Accident Data Analysis and Power BI Dashboard (Python, Pandas, Data Cleaning, EDA, Power BI)

- Prepared an accident-data analysis workflow to examine severity, time patterns, weather, lighting, road conditions, vehicles, and casualties.

Employee Database Management System (MySQL, SQL, Relational Database Design)

- Designed a relational database for employees, departments, projects, and timesheets using primary and foreign keys.
- Developed SQL queries with JOINs, filtering, and aggregate functions to analyze employee headcount, project hours, salary ranges, and department data.

EDUCATION

Master of Computer Applications (MCA) — Soundarya Institute of Management and Science, Bangalore University | 2024 – 2026

B.Sc. Computer Science — College of Applied Science Vattamkulam, Calicut University | 2021 – 2024

Higher Secondary— G H S S Niramaruthur | 2019 – 2021

CERTIFICATIONS

- Java Programming: Mastering the Fundamentals & Computer Networking — Scaler
- Machine Learning Using Python & Introduction to Front End Development — Simplilearn
- Introduction to Artificial Intelligence (AI) — IBM
- Database Management System — Udemy
- Embedded Systems & IoT with AI — XCEL Corp
- Introduction to UNIX — Infosys Springboard
- Blue Team Security Analyst & Cybersecurity Practitioner Program — Cyberverse Foundation
- Introduction to Cybersecurity, Cyber Threat Management, Computer Hardware Basics & Python Essentials 1 — CISCO

ADDITIONAL INFORMATION

- Languages: English, Malayalam, Hindi, Kannada, Tamil
- Soft Skills: Problem-Solving, Critical Thinking, Time Management, Teamwork, Adaptability
